

Spring Operated Roller Blind System

Silent Gliss[®] 4900

Product Information

- Silent and smooth spring operated roller blind system for residential and contract applications.
- Unique speed controller ensures a smooth, controlled ascent.
- Optional stop controller allows upper end stop limit adjustments.
- Can be specified up to a maximum width of 2m (min. width 30cm), a maximum drop of 3m or a maximum surface of 6m². The maximum load of 2.2kg should not be exceeded.
- Can be stopped at any given position.
- Easy wall, ceiling or recess fitting.
- Optional pre-mounted white installation profile.
- Side-by-side fixing of two systems with intermediate bracket cover ensures a minimized light gap.
- Optional side guide.
- Choice of four different bottom bar finishes - 3 bottom bar designs or fabric covered.
- Supplied ready assembled, made-to-measure with fabric.
- Child safety pull ball.

Profile and Specification Information

4227

Cannot be bent

Specification Guide - download from www.silentgliss.co.uk (password required).

Silent Gliss spring operated roller blind 4900 with speed controller 4228. Ceiling/recess/wall fix. Finished with aluminium bottom bar 4221 (round) / 10633 (rectangular) / 10634 (oval) / fabric covered. Optional stop controller to be fitted to guarantee exact stop position of blind.

How to Measure

Single system

A: system width (inside recess includes bracket covers)
 B: system drop
 C: fabric width

Please note:

- OUTSIDE recess does not include bracket covers, please add 4mm.
- measurements differ when side-guide option is used.

4900

Side-by-side systems (unconnected)

A: system width (inside recess includes bracket covers)
 B: system drop
 C: fabric width

Please note:

- OUTSIDE recess does not include bracket covers, please add 4mm.
- measurements differ when side-guide option or stop controller is used.

System Dimensions

Single system: 2m

30cm

3m

6m²

2.2kg

Maximum system width to drop ratio should not exceed 3.5:1

Please note: The maximum system width/drop is also dependant on the fabric type.

The maximum standard pull ball length when specifying a fabric covered bottom bar is 200mm (EN13120).
The child safety pull ball (11043) is standard on all aluminium bottom bars and can be specified up to 100cm.

System Options

Side-by-side fixing of two systems

10632 Intermediate cover

Side guides for stabilising blind systems and sloped applications (up to 15° incline)

Single system

Double system

A: Fitting of side guides inside window frame
B: Fitting of side guides onto front of window frame

4900

Adjustable stop controller

The adjustable stop controller is supplied as standard when a fabric covered bottom bar is specified. It is optional when an aluminium bottom bar is specified

It is built-in on the left hand side of roller blind (fabric rolls off back of barrel). For reverse roll blinds (fabric rolls off front of barrel), the end stop is fitted to the right hand side.

Please note: available for system widths from 60cm up to 200cm.

Child Safety Pull Ball Set

The child safety pull ball set 11043 is supplied as standard when an aluminium bottom bar is specified. It cannot be used when a fabric covered bottom bar is specified, in these situations pull ball set 10645 (max 20cm) will be used.

Fitting Information

Positioning of system

A: Ceiling Fixing
B: Recess Fixing
C: Wall Fixing

Fixing with installation profile (optional)

The optional installation profile can save fitting time on site. Mount the system with pre-fixed clamps 3044 or click brackets 10539.

4900

Easy front loading and removal of the blind

- A: Open click clasp on left side bracket
- B: Put blind into place: Right side first, then left side
- C: Close click clasp
