## ShadeTech® PB Pleated Blind Systems

By Waverley

### Detailed description

Pleated blinds are a neat and effective means of providing shading and privacy for the smallest windows (door vision panels) and where fixing space is limited (i.e. internal glazing). The lightweight design also makes ShadeTech® PB Pleated Blinds an excellent solution for sloping or horizontal glazing.

The blinds can be manually operated by cord or a hand held operating wand, or can be motorized with hard wired or remote switchgear. They are a very versatile solution for windows of any shape, and available in a range of flame retardant fabrics including fabrics with solar reflective backing, blackout fabrics and honeycomb fabrics to eliminate pin prick light holes associated with standard pleat. The pleats are fully retractable making them unobtrusive when not in use.

Powder coated slimline aluminium headrails are fixed at both ends of the blind and hold tensioned wires. The fabric with 20 mm pre-folded pleats is fixed to the rail at one end and finished with a matching aluminium bottom bar.

Features/ Benefits:

- Peace of mind - five year hardware warranty and minimal maintenance.
- Slim design allows blind to fit close to glazing for maximum performance.
- Extruded aluminium headrail available in white or brown powdercoat finish with matching brackets and endcaps
- Safe by design - meets BS EN 13120 child safety requirements.

Manufactured and installed in accordance with a quality system certified under BS EN ISO 9001: 2009.

### Options

Size (maximum, w x drop):

- PBC-E and PBC-W: 2150 x 2500 mm.
- PBF-C: 2150 x 3000 mm.
- PBF-E: 2150 x 2000 mm.
- PBT-E and PBT-W: 1700 x 4000 mm.

Motorized:

24 V radio (RTS) tubular motor concealed inside headrail (larger headrail than manual systems).
